OBJECTIVE

A Computer Science graduate and aspiring Data Analyst skilled in Python, SQL, and modern BI tools (Tableau, Power BI, Excel). Proven ability to analyze complex datasets, build data pipelines, and design interactive dashboards to drive data-informed business decisions and operational efficiency.

TECHNICAL & SOFT SKILLS

- **Programming Languages:** Python (Pandas, NumPy, Matplotlib, Seaborn), SQL
- **Data Analysis & Engineering:** Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Web Scraping, Git/GitHub, Machine Learning basics, NLP
- **Data Visualization Tools:** Tableau, Power BI, Microsoft Excel (Pivot Tables, Advanced Formulas)
- **Core Competencies:** Teamwork, Flexibility, Analytical Problem Solving, Rapid Adaptation, Professional Communication, High Discipline

PROJECTS

OmniStore Strategic Retail Analytics (Sql, Python, Power Bi) [\[Click Here\]](#) 2026

- Built an SQL ETL pipeline using advanced CTEs and window functions to clean corrupted logs, eliminate duplicates, and reconstruct rows to fix a systemic 15x profit calculation error.
- Conducted hypothesis testing in Python (SciPy) using T-Tests and Chi-Square tests to mathematically isolate and prove root causes behind margin leakage and high apparel return rates.
- Designed a high-fidelity Power BI executive dashboard in Dark Mode, featuring strategic color-coding and a collapsible filter pane to deliver actionable insights directly to leadership.

Marketing Analytics & Sentiment Dashboard (Sql, Python, Power Bi) [\[Click Here\]](#) 2026

- Engineered an end-to-end data pipeline to extract, clean, and transform raw marketing datasets using SQL.
- Developed a Natural Language Processing (NLP) sentiment analysis model in Python to categorize customer feedback.
- Designed an interactive Power BI dashboard visualizing customer trends, resulting in clear, actionable insights to optimize conversion and retention strategies.

HR Analytics Dashboard (Tableau) [\[Click Here\]](#) 2026

- Designed a dynamic Tableau dashboard to analyze workforce demographics, income distribution, and key HR metrics.
- Translated unstructured workforce datasets into clear visual trends to support strategic HR decision-making.
- Optimized data presentation to make complex workforce analytics accessible to non-technical business stakeholders.

EDUCATION

Bachelor's Degree In Computer Science 2026

First Class Honors Graduate, GPA: 4.98/5.00 (Excellent)

Work Experience

Data Entry Intern | Dawadmi General Hospital 2024

- Digitized physical medical records and securely uploaded files directly to the hospital's internal database.
- Audited data forms for accuracy while maintaining strict compliance with healthcare data privacy protocols.

CERTIFICATIONS

- **Career Essentials Program** – Misk 2026
- **Project Based Learning Programme In Data Analysis** – IBM 2024
- **Machine Learning Specialization** - DeepLearning.AI, Coursera, Stanford 2024
